SPRAY-IN LINERS & SECONDARY CONTAINMENT

Providing top-of-the-line secondary containment and well-pad accessories to the oilfield, Peak provides impermeable environmental protection. No matter your setup, we can customize a containment solution for your location.

LINERS

Peak's Premium Polyurea Lining (PPL) is a chemically curing, elastomeric polyurea coating economical containment system. The seamless, impermeable, and puncture spray-on liner was designed to meet EPA, SPCC, and CAFO regulations while serving as a defense against storage and containment failure as well as environmental contamination.

- 5-year warranty
- Impermeable environmental protection
- Failure, spill and leaching protection (from -25°F to 170°F)
- Title 40CFR112 and NSF61 compliant
- Applicable to natural substances
- Bonds to artificial materials

TANK PEDESTALS

Our reusable pedestals are a superior alternative to gravel rings and were designed to accommodate both 12-foot and 16-foot tanks. This gives our customers the ability to haul anywhere from a 300-barrel (approx. 110K lbs.) tank to a 500-barrel (approx. 181K lbs.) tank.

- Easily cleaned (eliminates ground contact)
- Insulating non-conductive
- Non-permeable polymer coating designed
- Non-corrosive (rot and mold resistant) to shed water
- Custom sizes and shapes available
- Quick installation

WALLS

Our premium in-ground and surface mount wall steel containment systems were engineered to support a full hydrostatic load. We custom build sites to our customers' specifications with quality and a safety-first mentality.

- Galvanized panels, steel posts, and C channel top rail
- Multiple colors along with B.L.M. colors channel top rail

BENEFITS

- Modular Design
- Portability
- Rapid Setup Times
- Slip Resistant Liner
- Polyethylene Material
- Engineered Strength

RELATED SERVICES

HIGH CAPACITY STORAGE

Our portable above-ground storage tanks (ASTs) can store up to 62,000 barrels of water, eliminating the need for in-ground pits and frac tanks.

WATERONE™

Our customers can receive remote access to real-time analysis of WaterONE water assets via data monitoring. Staying up-to-the-minute with fluid levels and quality allows Peak to respond immediately to on-site issues.

PRODUCTION CHEMICALS

Peak's works closely with and in-house Oilfield Chemicals division to provide prescriptive chemistry that enhances well performance and reduces production costs.
